Luxura Series-Palladium White

Luxura-Cast Acrylic is a solid surface-non-porous material made from acrylic and resin. This product is preferred by hospital, senior living and universities.

Luxura will not support mold, mildew or bacteria and cleans with warm water and a cloth.

Palladium White-180

Luxura Series-Crème Brulee

Luxura-Cast Acrylic is a solid surface-non-porous material made from acrylic and resin. This product is preferred by hospital, senior living and universities.

Luxura will not support mold, mildew or bacteria and cleans with warm water and a cloth.

Crème Brulee- 185

Monterey Series-Carrara-47

Monterey- Compressed solid surface. This product is produced using fiberglass and resin and then hydraulically stamped at over 40,000 pounds of pressure

Monterey- is available in a 4" x 8" subway pattern or a smooth velvet finish

Monterey- will not support mold, mildew or bacteria and cleans with warm water and a cloth.

Carrara-47

Monterey-Butterscotch-48

Monterey-Compressed solid surface. This product is produced using fiberglass and resin and then hydraulically stamped at over 40,000 pounds of pressure

Monterey-is available in a 4" x 8" subway pattern or a smooth velvet finish

Monterey- will not support mold, mildew or bacteria and cleans with warm water and a cloth.

Butterscotch-48

Solid White-21

Monterey- Compressed solid surface. This product is produced using fiberglass and resin and then hydraulically stamped at over 40,000 pounds of pressure

Monterey- is available in a 4" x 8" subway pattern or a smooth velvet finish

Monterey- will not support mold, mildew or bacteria and cleans with warm water and a cloth.

Solid White-21

Crème-49

Monterey- Compressed solid surface. This product is produced using fiberglass and resin and then hydraulically stamped at over 40,000 pounds of pressure

Monterey- is available in a 4" x 8" subway pattern or a smooth velvet finish

Monterey- will not support mold, mildew or bacteria and cleans with warm water and a cloth.

Crème-49

Silhouette- Compressed solid surface. This product is produced using fiberglass and resin and then hydraulically stamped at over 40,000 pounds of pressure

Silhouette- will not support mold, mildew or bacteria and cleans with warm water and a cloth.

Pearl Stone

Silhouette- Compressed solid surface. This product is produced using fiberglass and resin and then hydraulically stamped at over 40,000 pounds of pressure

Silhouette- will not support mold, mildew or bacteria and cleans with warm water and a cloth.

Silhouette- Compressed solid surface. This product is produced using fiberglass and resin and then hydraulically stamped at over 40,000 pounds of pressure

Silhouette- will not support mold, mildew or bacteria and cleans with warm water and a cloth.

Traditional Shower Bases

Shower Bases - Our SMFL, SMFLU are compressed solid surface using fiberglass and resin stamped at 40,000 pounds of pressure to build extreme strength into each base.

The SMFL Series features a 3" threshold with egg crate non-slip surface.

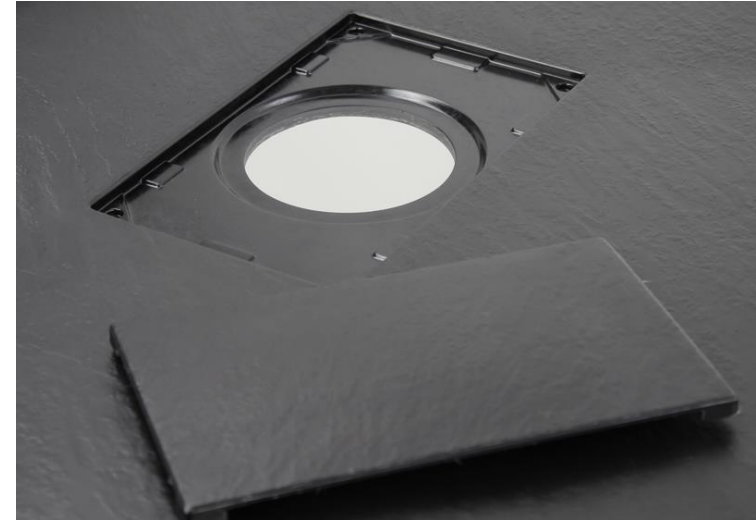

Our SMFLU base features a 2.68" high threshold and a 3.5 wide threshold to accommodate roller style doors. The drain location is perfect for a tub to shower replacement.

Low-Threshold Shower Base

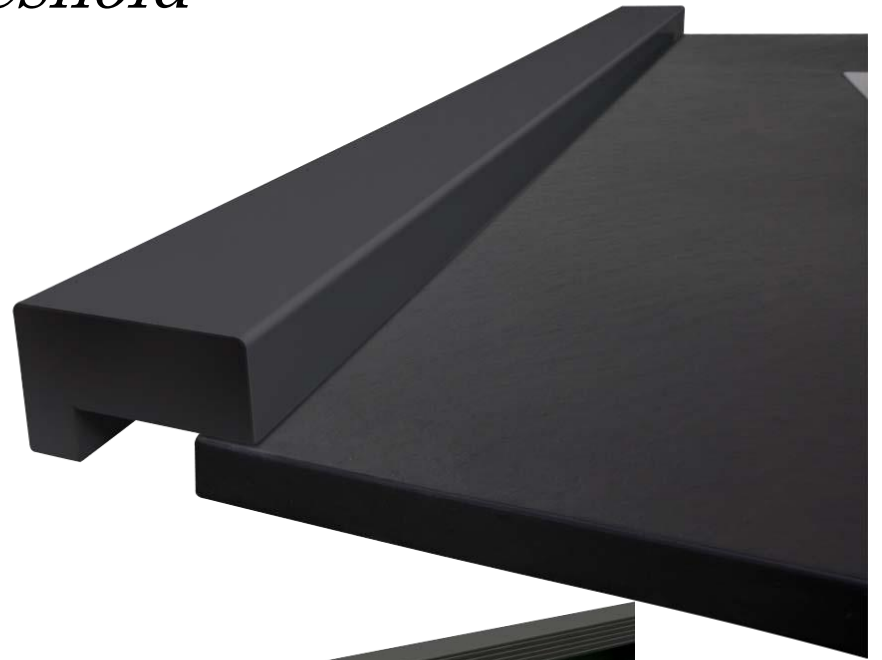

“Our most versatile base”
